VB.NET - Career Track

Introduction to .Net Framework

- Architecture of .Net 4.0
- Benefits of .Net framework
- Installing Visual Studio
- Visual Studio IDE

Getting Started with Visual Basic 2010

- New features in Visual Basic 2010
- Keywords
- Operators
- Data Types
- Selection statement
- Iteration statement
- Arrays Basic

Introduction Object Oriented Concept

- Class and Object
- Encapsulation
- Inheritance
- Implementing Polymorphism
- Structures
- Working with Properties
- Interface
- Namespace

Working with Windows Forms

- Visual Basic 2010 Windows Form Application
- Working with Multiple forms
- Message Box
- Input Box
- Dialog Box

Working with Windows Controls

- The Label Control
- The Textbox Control
- The Button Control
- The Progress bar and Timer Controls
- The Radio Button Control

Working with ADO.Net

- ADO.Net 4.0
- Classes in ADO.Net 4.0
- Type of binding in Windows form
- Data binding in WPF applications

Working with LINQ

- Introduction to LINQ
- LINQ queries
- Standard Query operations in LINQ
- LINQ to Dataset
- LINQ to SQL
- Anonymous types
- Lambda Expression

Project

- Implementing to all the above functionality
